R82[®] 

More than 30 years at eye level

R82 produces technical aids and appliances for disabled children and young people throughout the world. Based in Denmark with sales companies in England, Holland, Italy, Germany, Australia and the USA, we develop products tailored to individual needs.

Through comprehensive development R82 is constantly moving forward- but without compromising quality of service and closeness to the customer. Distributors in 45 countries spread over most of the globe ensure forward personal support, even after the product has been delivered.

The objective of each and every R82 employee is: adjustment to individual needs to provide the child the greatest possible freedom - in a world of movement.

Kudu[®]

The Kudu is a practical wheelchair which combines form and function to provide the right fit and support for a comfortable posture.

The Kudu is available in 4 sizes.

Highlights about Kudu

Growth adaptable

The base of the seat and the back rest are equipped with a mechanism that makes it possible to adjust height and depth as well as mount fix-locks for vests and belts.

Accessories are easily added and removed as needed for maximum user comfort

Centre of gravity

To adapt to different needs, the seat has a centre of gravity making it possible to adjust the rear wheels in 3 different positions.

Safe transportation

The Kudu complies with ISO 7171-19 for transporting children up to 57 kg in motor vehicles.

Standard

Swing-away anti tip device, tilt in space, back angling (recline).

Further measurements at our website

The Kudu is measured with the following wheel combination, placed in the standard wheel position: 22" rear wheel and 6" front wheel.

Nice to know

The many different configuration possibilities and accessories to the kudu makes it ideal to situations where complex and individualized seating solutions is needed and reusing of the product is desirable. Examples of individualized solutions is placing the centrally mounted foot plate underneath the seat or using the angle adjustable armrest and tray allowing the tray to be horizontally when the seat plate is angled.

The focus of the seating solution will often be comfort, however when configured with large driving wheel and cambering it is possible to promote self-propelling of the wheelchair over short distances to support user independence.

Cougar[®]

The Cougar is built for rehabilitation with comfort provided as standard and it has many adjustment possibilities and wide range of accessories.

The Cougar is available in 4 sizes for use by children and teenagers.

Highlights about Cougar

Back recline

The adjustment of the back tilt occurs in the anatomical pivot point of the hip and therefore with minimal shear.

Tilt in space

The Cougar has self-centering centre of gravity making it a stable comfortable chair. The tilt in space function gives the option of changing the users position and reduces pressure in the seating area.

Height adjustable

The seat to floor height is adjustable. Adjust the height on the back of the chair and the angle of the front wheels will remain in the correct position.

Accessories

Easily interchangeable for user comfort.

Standard

Patented change of seat to floor height, prepared for other manufactures seats and backs, easy change of seat depth, selfcentring centre of gravity, patented recline to ensures a minimum of shear, anti-tip safety.

Further measurements at our website

The Cougar is measured with cushion and the following wheel combination, placed in the standard wheel position: 22" rear wheel and 6" front wheel. The Cougar is measured with the seat in horizontal and back in vertical position. We supply various types of leg rests and cushions, which is why the weight is listed without. Different settings may result in another set of measurements.

Nice to know

Cougar can be fitted with a wooden board back or a strap back. Both backs are prepared for velcro fit cushion systems. Furthermore, the Cougar is often used for other seats and backs, such as moulded seats.

The stepless adjustment of the vertical position of the side supports allows a precise position of the supports in relation to the need of the individual user.

x:panda[®]

x:panda is a multi-adjustable seating system that can be configured to meet a range of postural requirements and to accommodate growth. Its dynamic back allows a child to extend and push back against relatively light resistance. It is available in 4 sizes.

Highlights about x:panda

The x:panda has a unique dynamic back that absorbs the energy of extension

Multi-adjustable

Overlap in sizing means that the starting option always offers the maximum growth potential coupled with individual leg positioning to offer an improved base of support and additional support for maintaining the correct degree of abduction/adduction if required.

Growth

Individual growth in width, depth and back height extends the life of the seat and accommodates the greatest range of sizes for any chair on the market.

Back recline

The patented articulation of the back rest has been designed to eliminate shear and sliding during extension. This means that support remains uniquely in position during movement improving functionality and comfort for the user.

Standard

Hip supports - front and back with cover, ad-/abduction support with cover, spacers for seat extension, dynamic backrest, lumbar support (x:panda size 4 only), fix lock fittings for mounting of various belts and vests, lockable dynamic gas spring.

Nice to know

The back height, seat width and depth adjustments, different accessories, the 16 pre-mounted fix locks and our range of frames allows you to configure complex and individualized seating solutions for a wide range of children.

The dynamic back has been documented to be associated with a better postural control and less involuntary arm movements during the extensor thrusts compared to a rigid seating system (Cimolin 2009).

Panda Futura[®]

The Panda Futura Standard seat is primarily for children who need support around the arms and shoulders. This active seat is for active children who need more freedom of movement. Panda Futura is available in 5 sizes.

Highlights about Panda Futura

A modular seating system with comfortable, six part cushion set

Fits on a variety of frames

The Panda Futura seat can be mounted on many different frames. Also, the seat on a indoor frame is easy to dismount and place onto an outdoor frame.

Back recline

The back can be adjusted independently of the seat. The pivotal point of recline is anatomically correct, i.e. in line with the hip joint.

Accessories are easily interchangeable for user comfort

Standard

Back angling (recline), tilt in space, back and seat cushions.

Nice to know

The design of the seat and accessories ensure that the seat is easy to use and clean. The two versions; the standard and active ensure the possibility to customize the product to the activity level of the individual user.

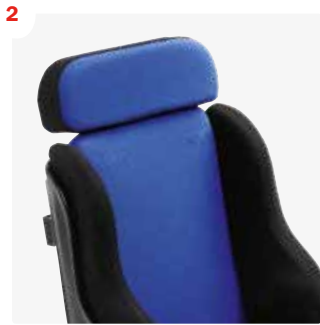

The Panda Futura seat is popular in settings, where reuse, financially viable and less complex seating systems are warranted.

Panda Futura 5[®]

The Panda Futura size 5 is a comfortable supportive seat for larger children and teenagers. The seat is available in two versions; Standard and Active which provides the required comfort, support and freedom of movement.

Highlights about Panda Futura 5

A range of accessories can be added

Easy change - active to standard

Mount separate sideplates and cushions and the seat is easily transformed into the standard model. Sideplates and side cushions are accessories.

Comfortable cushions

Angle adjustable back

Activate the handle on the back to carry out a smooth and stepless angle adjustment of the back.

Standard

Available as Standard for more comfort and Active for more freedom of movement in the trunk. Angle adjustable back from -5° to 30°.

Nice to know

Panda Futura 5 is our seat for the largest users. It comes in two versions (standard and active) with a max. load of 85 kg and a user height of 1700 mm, which makes the Panda Futura 5 suitable for most youngsters with cerebral palsy who need adaptive seating. According to the clinical growth charts for children with cerebral palsy less than 10% of the children and youngsters weigh more than 85 kg (Brooks 2011).

Scallop[®]

The Scallop is designed to aid floor sitting and to add extra support whilst sitting on a chair. Used by infants, children, teenagers and adults with mild to moderate disabilities as well as those without disabilities. It comes in four sizes.

Highlights about Scallop

Removable cushion

The Scallop cushions come in two reversible colours and can be easily removed from the shells and machine-washed at 60°.

Simple and flexible

Portable and lightweight

Weighing less than 2kg, the Scallop is easy to travel with. You can carry the product using the two handles provided.

Versatile

The Scallop is not only used for long sitting. It can also be attached to a wide variety of chairs to add extra support while sitting around a table to enable participation in everyday activities.

Standard

Carry straps, seat pit, 3-point belt for size 1 and 2, 2-point belt for size 3 or 4.

Options

Wombat Living[®]

The Wombat Living is a cool activity chair for both toddler, pre-school, school children, teens and youngsters. The fresh look with modern colours makes it suitable for use in any indoor environment.

Available in 3 sizes.

Highlights about Wombat Living

Tilt in space

The seat unit tilts from -20° to 15° to accommodate both relaxed and active sitting postures.

Angle adjustable push brace

Small details - big difference

The cushions are made from thick comfortable foam with breathable covers. Small details like shaped cushion that protect the user's knees and extra durable edges, make a big difference in everyday use.

Built-in growth

Wombat Living offers stepless adjustment for growth. Move the backrest forward or backward and adjust the hip supports to fit any user size. The hip supports can also be angled to support the user's hips and thighs.

Standard

Tilt in space, back recline and prone angle, adjustable seat depth, adjustable back height, height and angle adjustable foot support.

Nice to know

Use the Wombat Living for daily activities such as reading and learning at school, having fun with friends and when helping with daily chores at home.

The height adjustable frame and the anterior tilt function ease standing transfer into the chair and ensures that unnecessary and repetitive lifting is avoided.

Although the Wombat Living at first glance looks simple and for children with mild to moderate impairments, it is possible to use the large range of accessories to adapt the chair to users with more comprehensive needs for support for the feet, knees, thighs, pelvis, trunk and head.

Cricket[®]

The Cricket is a lightweight foldable buggy designed to suit you and your child's needs and lifestyle. This user-friendly buggy comes in two sizes and it adapts to the child's growth in several areas maximizing the number of years it can be used.

Highlights about Cricket

Back recline

For extra comfort, Cricket has a two-position back recline option for the user to change from a sitting position to a relaxed position. The backrest angle can be adjusted from 110° to 125°.

Growth adaptable

Easy Fold - Light weight

This lightweight buggy is extremely compact when folded and requires minimum storage space.

Height & angle adjustable foot support

The Cricket comes with a unique foot support that can be height and angle adjusted to support the individual needs.

Standard

Back recline, adjustable seat depth, height and angle adjustable foot support, angle adjustable push brace, front wheel with swivel, rear wheel with parking brake, compact and foldable.

Nice to know

Cricket's lightweight frame is one of the most compact on the market. The frame is designed to support and ensure stability for the buggy.

The height of the push brace on the Cricket can easily be changed using the angle adjustment and the 360° turnable front wheels ensure a smooth ride and makes it easy to steer. The puncture-proof wheels provide exceptional performance. Explore the experience of the smoothest ride - from city to tougher trails, from sun to rain.

Furthermore, the Cricket is approved for transportation and complies with ISO 7176-19, for safe transportation in vehicles.

Stingray[®]

Stingray is a superbly stylish buggy with tool free adjustment of postural support and unique swivel action for forward/rearward facing options.

The Stingray is available in 2 sizes.

Highlights about Stingray

Foldable

The Stingray is folded quickly and fits into almost any car. Fold the seat and frame units separately or altogether and pack it into your car - soon you will be on your way.

180° turnable seat unit

Tilt in space and back recline

Perfect seating position due to adjustable seat tilt and back angle adjustment. The seat unit tilts 45° and the back reclines down, allowing your child to rest while out and about.

Safe transportation in vehicles

The Stingray complies with ISO 7176-19, for safe transportation in motor vehicles. The Stingray is approved for transport in vehicles of a user weight of up to 40 kgs.

Standard

Tilt in space, back recline, adjustable seat depth, adjustable back height, height and angle adjustable foot support, turnable seat, frame one size.

Cruiser

The Convaid Cruiser is a 30° fixed-tilt pediatric wheelchair that is convenient, lightweight and compact folding. The Cruiser is custom-built to meet each individual requirements. It comes equipped with Convaid's proprietary self-tensioning seating system, Self-Tensio™, which provides increased seating tolerance and can help promote neutral pelvic positioning.

Highlights about Cruiser

Customisable growth capabilities

Adjustable seat depth extends chair life for a growing child.

30° fixed tilt

Increased tilt angle improves postural control through upper body positioning.

Foldable

The Cruiser is folded quickly and fits into almost any car.

Self-Tensio™

Built in self-tensioning seating system increases sitting tolerance.

Standard, Cruiser Standard

Solid and foldable frame, fixed tilt, anatomic back, flip-up armrest, 2-point positioning belt, off road tires, castor lock, toggle wheel locks, attendant brake and swing-away foot plates.

Standard, Cruiser Scout

Solid and foldable frame, 30° fixed tilt, seat depth growth, one-piece angle adjustable push brace (CX12-CX16) or two-piece push handle (CX18) 2-point positioning belt, quick release rear wheels, castor lock, toggle wheel locks and removable adjustable swing-away foot plates.

Rodeo

The Convaid Rodeo is a popular pediatric tilt-in-space wheelchair that is convenient, lightweight and folds compactly. The Rodeo provides up to 45° of adjustable tilt that offers pressure relief and upper body support. This tilt-in-space Rodeo is fully customizable to meet user's specific therapeutic needs and provides growth option through its adjustable seat depth feature.

Highlights about Rodeo

Adjustable tilt and back recline

Provides pressure relief and support.

Customisable growth capabilities

Adjustable seat depth extends chair life for a growing child.

Lightweight and durable

Lightweight frame combined with high Max. load - up to 77 kg.

Individual positioning

Accommodates functional or rest positions and increased sitting tolerance for maximum comfort.

Standard

5 to 45 degrees of adjustable tilt, recline, central mounted foot brake, adjustable one-piece push handle, closure strap, seat depth growth of 13 cm, frontwheels with directional stabilizer, 2-point positioning belt, elevating legrest /one-Piece, angle adjustable footplate.

*Only High-low Frame outdoor version for outdoor use.

High-low Frame[®]

The High-low Frame is a stable base with a user friendly height adjustment from floor to table height.

The High-low Frame is available either as an indoor frame with small lockable castors or as an outdoor frame with large wheels and foot brake.

Highlights about High-low Frame

Height adjustment

The height is adjustable from floor to table height. The frame are available with either gas or power height adjustment.

Interface

Various seats can be mounted on the High-low Frame by means of an interface. Here a High-low Frame for outdoor mounted with a Panda Futura.

Angling of seat base

The seat base has an angle range of 40° which helps obtain varied seating positions. The base can be set to angle from 0° to 30° or from -10° to 20°.

Safe transportation in vehicles

The High-low Frame, outdoor, complies with the international transit wheelchair standard ISO 7176-19. The High-low Frame, outdoor, can be used with seat units that comply with ISO 16840-4.

Standard

Height adjustment, angling of seat plane, one size outdoor frame with 12 1/2" rear wheels 7" swivel front wheels and foot brake, one size indoor with 100 mm lockable castors.

Multi Frame:x[®]

Designed to provide extraordinary stability and safety, the Multi Frame:x is the perfect choice of wheelchair base for large seat units like the Panda Futura 5 and x:panda 4. The Multi Frame:x is a strong, stable and highly manoeuvrable wheelchair base.

Highlights about Multi Frame:x

Seats for Multi Frame:x

Multi Frame:x is the perfect choice of wheelchair base for large seat units like the Panda Futura 5 and x:panda 4 from R82.

User-friendly adjustability

The tilt-in-space and back recline functions are operated from the push brace ensuring optimum working conditions. Stepless recline of the push handle makes it possible to adapt the height to any carer.

Seat height adjustment

Positioning the user as close to the floor as possible ensures a much easier transfer.

Tested and approved

The Multi Frame:x complies with ISO 7176-19, transporting users in motor vehicles. The Multi Frame:x can be used with seat units that comply with ISO 16840-4.

Standard

Built-in recline, built-in tilt, anti-tip device, seat height adjustment, angle adjustable push brace.

Options

|---|-----------------------------------|------------------|
|  | Seat surface height at front edge | 410, 435, 460 mm |
|  | Max. Load | 100 kg |
|  | Max. load at transportation | 100 kg |
|  | Seat plane angle | -5-30° |
|  | Width between wheels | 215 x 405 mm |
|  | Length | 840 mm |
|  | Overall width | 660 mm |
|  | Overall height | 980 mm |
|  | Total mass | 20 kg |

The Multi Frame:x is approved for transporting users in motor vehicles. Secure the user with an approved 3-point belt according to ISO 10542-1 and use an approved 4-point strap-type tiedown system according to ISO 10542-2 to secure the wheelchair in a forward-facing position in the vehicle. All removable accessories must be dismantled and secured separately in the vehicle.

Nice to know

Use the seat height adjustment to position the user as close to the floor as possible for easier transfer – or use the seat height extension to increase the distance from the frame to the floor to 460 mm, which allows for customisation for users with longer legs.

Stingray Frame[®]

The Stingray frame with 180° turntable base makes it possible to move your child from forward to rearward facing without leaving their seat.

The carbon Stingray Frame is in a league of its own with the trendsetting design, great adjustments and ease of steering.

Highlights about Stingray Frame

180° turnable seat unit

Revolutionary function with a 180° turntable seat unit. Let your child explore the surroundings during the trip or simply turn the unit to obtain eye contact with your child.

Foldable frame

The Stingray Frame is foldable for storage and transportation.

Tilt in space

The tilt in space function is very useful when the user needs to rest. Simply angle the complete unit into the desired position.

Safe transportation in vehicles

The Stingray Frame complies with the international transit wheelchair standard ISO 7176-19. The Stingray Frame can be used with seat units that comply with ISO 16840-4.

Standard

180° degree turntable base, one size with 12" rear wheels, tilt-in-space, adaptor plate.

Combi Frame:x[®]

The Combi Frame:x is a unique wheelchair frame for customized seating systems. The Combi Frame:x is ideal for both indoor and outdoor use and can be fitted with different seat and back systems. The Combi Frame:x is suitable for users needing an individual seating system and base.

Highlights about Combi Frame:x

Centre of gravity and tilt in space

The Combi Frame:x centre of gravity is self-centring. The seating unit can be tilted from horizontal to 40 degrees.

Compatible with different seat and back systems

The Combi Frame:x can be equipped with different back systems and cushions.

Fixed mounting or interface

Various seats can be mounted directly onto the Combi Frame:x. Alternatively the seats can be mounted into an interface. The frame is used for a variety of seating units like the Panda Futura and x:panda from R82.

Safe transportation in vehicles

The Combi Frame:x complies with the international transit wheelchair standard ISO 7176-19. The Combi Frame:x can be used with seat units that comply with ISO 16840-4.

Standard

4 sizes, self-centring centre of gravity, prepared for x:panda, Panda and moulded seats, anti-tip device.

Nice to know

The Combi Frame:x is a unique wheelchair frame for customised seating systems. The multiple adjustment possibilities and the large accessories selection allows for a highly customised seating solution for the individual user with complex needs.

The kit for dynamic back rest with recline provides dynamic movement of the back rest. A dynamic back allows the user to push back during the extensor trust and supports the user to regain the starting point for the movement.

Strong Base[®]

The Strong Base is a simple, stable and sturdy base for large seat units such as the Panda Futura 5 and the x:panda 4.

Seat units are mounted either directly onto the Strong Base or by means of an interface making it easy to switch between frames.

Highlights about Strong Base

Height adjustment

The Strong Base has either manual or spindle height adjustment. The manual base adjust from 30 to 55 cm in height - the spindle base adjust from 30 to 51 cm in height.

Tilt in space

The tilt in space function helps obtain varied seating positions. Simply angle the complete unit into the desired position. Tilt in space from -10 to +25°.

Fixed mounting or interface

Various seats can be mounted directly onto the Strong Base. Alternatively the seats can be mounted by means of an interface.

Easy to manoeuvre

The smooth running castors make it very easy to move the Strong Base around. All four castors are equipped with directional stabilizers and brakes.

Standard

1 size in 2 versions, built-in tilt in space, 125 mm swivel castors with brakes and directional stabilizers, lock on all 4 wheels, seat plate.

Meerkat[®]

The Meerkat is a simple and modular built standing frame with a free choice of positioning in anterior or posterior.

The Meerkat is available in 3 sizes and suitable for children and youngsters.

Highlights about Meerkat

Dynamic standing

The child's freedom of movement is encouraged with minimal support, pure product design and the innovative rocker.

Simple and intuitive

All support is intuitively easy to use and adjust, making life easier for parents and carers. The low entrance height ensures easy transfer.

Easy adjustments

Simple adjustments can be done without any tools required. The child can have fun and play while standing.

Growth adjustable accessories

Growth opportunity and increased reuse possibility.

Standard

Base plate with wheels, column, tool.

Nice to know

The Meerkat can be used to create a learning environment, where the chest, pelvic and knee supports are used to provide the child with the exact support needed to challenge static and active trunk control. When the Meerkat is fitted with a rocker, it is possible to challenge the child's reactive trunk control.

When the child develops control over a segment of the trunk, the support can gradually be moved from top down.

Thereby the Meerkat allows the child to develop trunk control, as seen in typically developing children, which might lead to improvement in gross motor function and mobility.

Rabbit[®] Up

The Rabbit Up is a truly adaptable stander. It is secure, reliable and adjustable for all standing needs while also offering the independence to explore using the optional driving wheels. The Rabbit Up enables the child to be an active participant whilst stimulating senses and providing the child with more independence.

Highlights about Rabbit Up

Stander and Mobile stander

The Rabbit Up not only meets all your standing needs but also offers its users the freedom and opportunity to explore using the two optional driving wheels, giving additional independence to the child.

Angle adjustable centre bar

The Rabbit Up has two simple, easy to use angle adjustment options: fixed positions and stepless spindle. This makes transfer easier and helps obtain the best possible position for standing and propelling the driving wheels.

Quick release wheels

The two driving wheels are equipped with quick release for easy mounting and dismounting. The wheels are available in a variety of sizes from 22" up to 36" so you can find the perfect fit for the child.

Camber angling

If you choose to use the driving wheels on your Rabbit Up you have the possibility to change the camber angle. This enables an optimum position of the driving wheels, making propelling easier for the child.

Standard

Mobile stander: Frame, center bar, two driving wheels, standard camber angle, four castors, spoke protectors, fixed positions angle adjustment. Standing frame: Frame, center bar, four castors with brakes.

Toucan[®]

The Toucan standing frame comes with soft curves and smart colours. It is designed to support the user in the upright and prone position.

The Toucan is available in 5 sizes.

Highlights about Toucan

Angle adjustable centre bar

The Toucan has easy and smooth angle adjustment making it possible to obtain the optimum standing position.

The Toucan is designed with slots in the centre bar for mounting accessories

Handle with lock

The handle for angling the centre bar is equipped with a security lock. Pull out the lock whilst turning the handle to change the angle.

Castors with locks

All four wheels are equipped with locks securing the Toucan for stability. The wheels are very easy to manoeuvre making it easy to move the Toucan around.

Standard

Frame, castors, wheel locks, centre bar, tilt wind system.

Further measurements at our website

Nice to know

The distance from the floor to the foot plate is only 60 mm, which makes it possible for most of the target users to step into the Toucan.

The target users will be able to maintain antigravity head posture; however, it is possible to mount a head support to compensate for inability to maintain the head alignment during standing.

Caribou®

The Caribou is a standing frame that supports a prone or supine standing position. The Caribou is available in 4 sizes and suitable for children and teenagers.

Highlights about Caribou

Easy transfer

The Caribou tilts from vertical to horizontal. The horizontal position makes it easier for the carer and less stressful for the user to be placed into position.

Compatible accessories

The Caribou accessories are compatible with all sizes, and are easily fitted and adjusted on the Caribou frame.

Easy tilt

The Caribou is supplied with an easy tilt mechanism.

Anatomic design and comfortable

Soft mouldable PU for comfort.

Standard

100 mm castors with locks, height and angle adjustable parted foot support, tilt: From vertical to horizontal.

Options

| Size | Version* | Foot plate |
|--|--------------------------|---|
| - Size 1 - Size 2 - Size 3 - Size 4 | - with power - manual | - Parted foot supports makes it possible to adjust individual foot heights and angles |

*Sizes 3 and 4 are recommended in the power versions to ease tilting

Frame colour

Yellow for size 1

Red for size 2

Blue for size 3

Anthracite grey for size 4

The Caribou can be ordered as either manual or power version

Nice to know

The extensive accessories selection allows children and youngsters who have severe limitations in head and trunk control or who experience limitations in their range of motion to adopt the standing position. Thereby the Caribou supports the child to participate in things they value – and it can bridge the disparities between children with and without disabilities.

When used for prone standing, the shape of the top plate ensures freedom of movement and allows the child to use their arms and hands actively, for instance at the table in front of the body and standing frame.

Gazelle PS[®]

Gazelle PS stands for Prone and Supine which means it can be used by children who need to be supported on their fronts or backs. It offers up to 30 degrees of hip abduction in each leg.

The Gazelle PS is available in 3 sizes.

Highlights about Gazelle PS

Tilt vertical-horizontal

The Gazelle PS tilts from vertical to 15° past horizontal. This is an excellent position for respiratory therapy and postural drainage.

Compatible accessories

The Gazelle accessories are compatible with all sizes, and are easily fitted and adjusted on the Gazelle frame.

Multi-adjustable foot supports

Ball joints in foot plates allow for positioning and support for almost any ankle/foot placement.

Manual leg abduction

Gazelle moves in an anatomically correct motion to help position the head of the femur into the acetabulum. You can adjust either one or both legs to the optimal angle.

Standard

Multi adjustable foot support, knee support, foldable bracket for back support, removable back support, trunk safety belt, castors with lock, manual leg abduction, tilt from vertical to horizontal, adjustable trunk or chest support.

Mustang[®]

Mustang is a highly adaptable walking aid for children and youngsters and it can be configured with anterior or posterior support to meet a wide range of walking needs.

The Mustang is available in 4 sizes.

Highlights about Mustang

Motivating the child to walk

The user is placed at the centre of the Mustang which provides core stability and enables the user to focus energy on walking.

Easy to access

The Mustang has been constructed with accessibility in mind. The U-shaped frame and wrap around support, allows for easy access and transfer.

Natural walking pattern

The Mustang has an easy to adjust central bar for height and angle adjustment. A slight forward leaning position, combined with built-in suspension, stimulates the natural walking pattern.

Accessories are easily added or removed for the carers convenience

Standard

Four sizes, directional stabilizer, drag wheel function, tension adjustable wheels, angle adjustment, reverse brake on/off, height adjustment.

Options

Further measurements at our website

*Measured with 8" wheels. The Mustang is measured as standard delivered and with the center bar in vertical position. Different settings may result in another set of measurements. To accomplish some of the measurements above, a slight adjustment might be required. We supply various types of accessories, which is why the weight is listed without

Nice to know

Mustang is a highly adaptable walking aid, which can be used as a posterior or anterior walker. A recent systematic review was unable to make recommendations for the use of anterior or posterior walkers based on the existing evidence. However, the majority of walking aid user and their parents preferred posterior walkers (Poole 2017).

For children who are "new" walkers the anterior support makes them feel safe and keep them away from hitting objects with the body as they practice their walking skills. The more "experienced" walkers might feel free and more independent and able to get closer to objects with posterior support.

Crocodile®

The Crocodile is a walking aid for children and young adults to help them into a more upright position. It is placed behind the child and its lightweight design makes it easy to move.

The Crocodile is available in 3 sizes.

Highlights about Crocodile

Height adjustable top frame

Easy to adjust the height without using any tools.

Multi-adjustable handles

Positioning the grips close to the body gives better support and a better walking position.

On/off anti-reverse stops

The anti-reverse wheel stops are used for children with less balance and control.

Foldable frame

Makes storage and transporting the Crocodile easy.

Standard

Width and height adjustable handles, lightweight durable aluminium frame - sizes 1 and 2, stable steel and aluminium frame - size 3, upholstery and cover for top frame, solid front and rear wheels, swivel front wheels with directional stabilizer, adjustable drag wheels (rear wheels), on/off anti-reverse wheel stop.

Pony[®]

The Pony is a gait trainer for children with disabilities. It has a frame shaped like an arrow and a central bar that holds the chest support and the seat. The Pony is available in 3 sizes.

Highlights about Pony

Back support

Allows for height and depth adjustment for positioning the pelvis into a neutral position. Furthermore the back support can be removed for easy access into the walker.

Adjustable forward lean

Adjusts to accommodate optimal walking angle and initiate the stepping process.

Height adjustable seat

Allows for height adjustment to fit the user and provide optimum positioning when walking. The child is not supposed to sit on the saddle.

Brakes on castors

The Pony has brakes on the two front castors. Further, it is equipped with one drag wheel and directional stabilizer for added support.

Standard

3 sizes, 5 wheels (1 rear and 2 front with lock), bumper wheels, black center plate, hand bar, seat and back support, safety strap.

Nice to know

The Pony gait trainer is popular in settings, where multiple users, reuse, finically viable and less complex walking solutions are warranted.

The simple and solid design of the Pony assist children, who are unable to maintain a standing position and walk, to be mobile indoor over shorter distances.

Stingray Swing-out® (STS0)

The Stingray Swing-out offers optimum support and function – it tilts, it swivels and it slides. It is available in 4 sizes and suitable for children weighing from 9 to 36 kgs. With its adjustment for growth, it will meet the needs of a growing child for longer.

Highlights about Stingray Swing-out

Swing-out function

The Swing-out frame enables parents to turn and slide the seat in and out of the car so they don't have to bend when lifting the child into the seat. It also avoids straining their back.

EasyFit System

The Stingray swing-out car seat frame is easy to fit in cars with ISOFIX but can also be secured using the Easyfit belt tensing system. The car seat is available in a left or right version.

Tilt Adjustment

The ingenious tilt has a range of 10-30 degrees making it possible to position the child in an active or more relaxed position.

Tested and approved to ECE 4404

The Stingray Swing-out car seat is approved according to ECE 4404 and has been crash tested for user weights between 9 and 36 kgs.

Standard

Adjustable tilt in space 10° to 30°, slide and swing-out function on frame, height adjustable 3-point belt guide for the seat belt, height adjustable headrest, adjustable seat depth, easyfit mounting system for Isofix brackets.

Flamingo High-low[®]

Flamingo High-low is a modern height adjustable toilet and shower seat, allowing carers to perform bathing tasks in a convenient and good working position. The Flamingo High-low is available in 4 sizes.

Highlights about Flamingo High-low

Adaptation of working conditions

Height adjustability eases transition between shower, toilet and sink and provides optimum working conditions for the carer.

Optimum positioning

The Flamingo High-low offers simple tilt-in-space and back recline functions. It is very easy to position the user with knees higher than the hips which has been proven very effective for bowel function.

Easy to use

The Flamingo High-low has easily accessible foot pedals for height adjustment and tilt-in-space. The pedals are equipped with security locks for added safety.

Inlay seat with wider sides for comfort and reduced seat width

Standard

Height adjustable frame, 4 white castors with lock, tilt in space, foot support, recline, stainless steel frame, active back (no sides), 100 % waterproof upholstery for seat and back, splash guard - high model.

Heron[®]

The Heron is a state of the art toilet and bathing seat. It is available with and without power. The simple design and clean appearance conceal multiple functionality features that improve both the user and carer experience.

Highlights about Heron

Optimum positioning

The Heron is suitable for teenagers and transition to young adults. Change the back height and add a couple of simple accessories to change seat width and seat depth – it is easy to make the Heron fit perfectly!

Perfect working conditions

One of the great features of the Heron is the hydraulic or powered height adjustment which allows you to adjust the chair into the correct position.

Pressure mapping has been used in the design of Heron to minimise pressure

Heron is available as a hydraulic (100kg) or power version (130kg)

Standard

4 grey castors with locks, stainless steel frame, height adjustable frame, integrated push handles, built-in tilt in space, built-in recline, active - height adjustable back, potty ring.

Options

- Version**
- Hydraulics
 - Power

Nice to know

The 125 mm grey castors with locks make it easy to manoeuvre the chair and minimises the demand of the caregiver.

Heron is washable at 85 °C in a washing machine designed for medical devices. Remember to remove all accessories, unplug all cables and make sure to dismantle the control box, battery and remote control before machine washing.

Swan[®]

Swan is a simple toilet and bathing chair. The seat is made of a smooth material, which makes it easy to clean. The frame and castors are stainless steel with rust-proofed surfaces.

The Swan is available in 6 sizes.

Highlights about Swan

Tilt in space

Tilts 20° for the child's optimum positioning and comfort.

Anatomical shape

The Swan has a carefully designed shape that follows the user's contours for improved stability and comfort.

Holder for pan

For use of pan inside or outside the bathroom.

The stainless steel legs adjust to accommodate most toilets

Standard

For size 2 - 3: 4 height adjustable legs, holder for commode pan, tilt in space, built-in pommel.

For size 4 - 7: 4 height adjustable legs, holder for commode pan, tilt in space, 4 white castors with lock, removable splash guard.

Nice to know

The simple and easy to clean design makes the swan popular in settings, where multiple users, reuse, finically viable and less complex solutions are warranted. Add the padded upholstery and a head support to increase the comfort of the user.

The swan allows caregivers of children with difficulties in maintaining the sitting position while toileting and showering the possibility to assist them with basic self-care.

Manatee®

The Manatee bathing chair is designed to place the user in exactly the right sitting position. The depth of the seat can be adjusted, allowing the bathing chair to “grow” with the child.

The Manatee is available in 4 sizes.

Highlights about Manatee

Head cushion/lateral support

Provides support and comfort for bathing children. Cushions can be used for head or torso support.

Adjustable back and leg rests

Allows adjustments of the back and lower leg supports with a simple pull of a strap or push of a button.

Provides depth adjustment for growth

Adjustable waist strap

Supports the child safely in the Manatee.

Standard

Head/lateral support, belt for waist/hip.

Options

Orca | Penguin[®]

The Penguin can be used in the Orca bath tub, but fits ordinary bath tubs as well. With its suction cups, the Penguin sits firmly on most smooth surfaces. Orca and Penguin are available in one size.

Highlights about Orca | Penguin

Excellent working conditions

Free space around the sides makes it easier for a carer to get close to the child providing optimum comfort. Four smooth running wheels makes it easy to move the bath tub around.

Easy to handle

The frame can be taken apart to minimise space for storage or transportation. The smooth and hygienic surface makes it very easy to clean.

Penguin - suction cups

Secures the Penguin in the bath tub.

Freedom of movement

Abreast of the future

As the name suggests, R82 was founded in 1982. Since those early pioneering days in the rehabilitation sector, R82 has created simple and user-friendly technical aids and appliances for disabled children and young people.

Flexibility and adaptation to the needs of the individual user were at the heart of the founding of R82 and still is.

Thanks to the consistent philosophy of constant development and high-tech production in a healthy working environment, R82 remains a vibrant, dynamic and growing company.

With a well-designed and high quality range of products in all areas of the technical aid and appliance business, R82 constantly keeps abreast of the future – to the benefit of both users and helpers.
