(SUI)

Stress Urinary Incontinence (SUI)

Are you a mum of one, two, three or more kids?

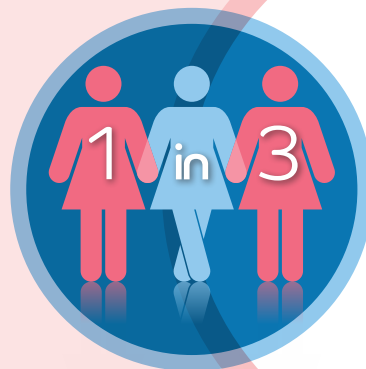

Is your bladder not as strong as it used to be?

Have you ever laughed, coughed, sneezed, exercised and leaked a little?

Maybe you have given up running, going to the gym, playing with the kids, socialising with friends and family because of fear of bladder leaks.

You're not alone.

Bladder leakage, or urinary incontinence is a common condition that affects **1 IN 3** in the UK at some stage of their life. Frequent or occasional it can vary from a few dribbles to a complete loss of bladder control.

What causes stress urinary incontinence?

- Pregnancy / childbirth
- Menopause
- Chronic cough
- Obesity

It's a mechanical issue that results from insufficient support to the bladder.
