

# PLATFORM STAIRLIFT GTLE

LEVEL

Compact versatile platform stairlift

[www.levellifts.co.uk](http://www.levellifts.co.uk)

# INTRODUCING THE GTLE

GTLE, the ultimate platform stairlift solution, enables step-free access to different floor levels in residential and commercial settings. It can be fitted to both straight and curved staircases.

This cleverly designed product, complete with an automatic safety arm and mechanical wheel-stop, provides a safe and secure journey for wheelchair users between floors without the need for transfer, and even offers an optional folding seat.

The GTLE is a testament to the highest quality, suitable for both indoor and outdoor use. Its modern ultra-slim design is ideal for narrow stairs.

Cost-effective and easy to install, the GTLE platform stairlift is a smart and economical alternative to a vertical or home lift, ensuring you get the best value for your money.

Thanks to top-quality materials, innovative technology, an attractive design and an uncompromising commitment to flexibility, we guarantee the best possible comfort and safety for all our products.

- 1 Informative display with voice output makes things easier to understand.

- 7 Roll-off guard, optionally available with 3rd ramp.
- 8 Stainless steel rail: top part can be used as a handrail.

# MAKING LIFE EASIER

## GTLE INCLUDES INNOVATIVE FEATURES

### **SURFACE-MOUNTED WIRELESS WALL SWITCH**

Ergonomic soft-touch control buttons. Wireless functionality and no unsightly cables on the wall.

### **HAND-HELD REMOTE CONTROL**

Enables assisted control, reassuring those who are unable or who don't feel comfortable operating the lift independently.

### **FLUSH-MOUNTED WIRELESS WALL SWITCH**

The ideal wireless wall switch for incorporating into existing switch installations.

### **SAFE AND STURDY STAINLESS-STEEL RAIL**

Minimalist, premium-quality guide rails. Durable functionality - can also be used as a handrail.

# FLEXIBLE SOLUTION

## BESPOKE OPTIONS

Elevate your space with a customised GTLE platform stairlift by choosing from a wide range of colours to complement or seamlessly blend with your surroundings. Our stair lift systems are built to specification and installed by our dedicated and trusted in-house engineers, ensuring that every detail aligns with your vision, is fit for purpose and enhances your environment. Make a statement with a lift that truly reflects your style and requirements.

### SUITABLE FOR INTERIOR AND EXTERNAL INSTALLATION

Whether it is installed in an indoor or outdoor environment, the durable GTLE delivers a reliable solution, even in harsh climatic conditions.

The optional Marine Grade Pack allows the GTLE to be installed in saltwater and chlorine-rich environments, such as coastal locations and swimming pools.

### OPTIONAL THIRD RAMP AND VARIABLE PLATFORM DIMENSIONS

Optimum use of space and maximised platform thanks to millimetre-precise adjustment.

THE GTLE also comes with an optional third ramp. Ideal for spaces which have limited space for accessing the platform from the opposite side of the lift.

## PERFECT FOR NARROW STAIRCASES

The compact and sturdy chassis is located a minimum of 240 mm from the wall with the platform folded up to provides more space, particularly on narrow staircases.

Landings can be safely passed using curves or by changing the inclination. The rail is attached directly to the wall or to supports.

Multiple stopping points and parking positions can be individually planned.

# INSTALLATION AND AFTER-CARE

## WE HAVE IT COVERED

### THE INSTALLATION PROCESS

Level Access Lifts has over 30 years of experience in surveying, installing, and maintaining platform stairlifts: we are proud of our reputation as the market leader in this sector. Our customers are often surprised at how easy the whole process is and regularly recommend us to their friends or colleagues.

We work closely with our customers to ensure a seamless service. Our GTLE platform stairlift is manufactured in Austria and will be delivered to our technicians to install within a six-to-eight-week period. Installation takes between one and two days.

The GTLE has an informative display screen that lets you know what is happening at all times. Our technicians are able to make changes to the machine's parameters and performance via this screen for your comfort and to ensure maximum reliability.

### ENERGY EFFICIENT

The GTLE operates using batteries that are continuously trickle-charged from the mains supply, similar to how a mobile phone charges. This ensures the stairlift still functions in both directions even during a power outage. Very little electricity is used during operation, making the GTLE platform stairlift cost-effective for your utility bill.

### PEACE OF MIND WARRANTY

We provide a fully comprehensive parts and labour warranty. Customers also receive two preventative maintenance visits during the first 12 months.

### SERVICING YOUR STAIRLIFT

For a competitive annual fee, we will continue to provide the same level of service that you have become used to, from our Factory Certified Technicians.
